## Post 1 - What to do going forward

## Overall review of the course so far

This class has been a steep learning curve for me. I've never taken a programming course before, and I've only had minimal coding experience previously. I think this class has been a good initial introduction to what coding/programming is and what I can do with it. It's just as useful as I imagined it would be, but more fun than I anticipated. I have, however, also learned that coding is something which takes time and effort to learn. You cannot simply expect to learn passively or without putting in the time.

## How I've learned Including Plots

You can also embed plots, for example:

Note that the echo = FALSE parameter was added to the code chunk to prevent printing of the R code that generated the plot.
